Harvey Mudd College
Spring FAST* Program

*Future Achievers in Science and Technology

March 31, 2014

Encourage your future mathematicians, scientists and engineers to apply to Harvey Mudd College's Spring Future Achievers in Science and Technology Program. The FAST program is an opportunity for local, high-achieving, college-bound high school juniors from populations that are underrepresented in math and science to experience HMC. The program will include class visits, research lab tours and much more. Most important, participants will interact with Harvey Mudd students, professors and other college-bound students who share their passion for the science, technology, engineering and mathematics (STEM) fields.

The program is free for participants and includes a meal. Spring FAST Program participants also receive a fee waiver for their 2015 first-year application.**

Students can gain more information and apply for the Spring FAST Program at:
hmc.edu/fast

**Applications must be received by Monday, March 3, in order to be considered (Please note: Applicants must submit an unofficial high school transcript with their application.)
